FAST MODULES

Microlearning Courses

Maximum Learning in Minimal Time

Today's modern learner is excited to learn but time is limited. According to a Deloitte study, 1% of a typical workweek (24 minutes) is all that employees have to focus on training and development. In addition, they want training that is tailored to their needs and can be accessed at their convenience on any mobile device.

Flashback Approach Sectioned Training Modules, or FAST Modules, are five to ten-minute microlearning courses. Each FAST Module provides a quick overview or a refresher on one specific topic within a regulation, instead of the entire course, allowing students to focus on topics specific to their job role or skill level.

1% of a typical workweek (24 minutes) is all employees have to **focus on training and development**
